### Business Redesign - Darcy Rose

Overall designing our website flowed very well and didn't run into too many problems. This had a lot to do with my partners and how well we all worked together. Darcy was dedicated and hard working throughout the whole assignment, always putting in the extra mile whenever she could. She re-designed the menu after she told us the first draft was insufficient, as well as coded the home, location, and orders page almost entirely on her own.

Darcy helped immensely when it came to the figma. Not only did she design the home page, but she also helped re-design the menu into separated pages when our initial design got reviewed and rejected. She also came up with the idea to have the location page to have and actually map that linked to google maps for people to find directions to the restaurant. She also almost single handedly designed the Home page, location page, and Orders page on her own, with only minor adjustments made by me and Isaias. Additionally she was always there to run ideas by for the rest of the project, helping me test the right looks for the website.

Overall Darcy was the one to hold the group together, always checking in on us and being there to help. She was determined and persistent through the whole assignment and i would be honored to work with her again.
